EXPLANATORY NOTES

AGREEMENT

1. This NATO Standardization Agreement (STANAG) is promulgated by the Director, NSA under the authority vested in him by the NATO Military Committee.
2. No departure may be made from the agreement without consultation with the tasking authority. Nations may propose changes at any time to the tasking authority where they will be processed in the same manner as the original agreement.
3. Ratifying nations have agreed that national orders, manuals and instructions implementing this STANAG will include a reference to the STANAG number for purposes of identification.

DEFINITIONS

4. Ratification is "In NATO Standardization, the fulfilment by which a member nation formally accepts, with or without reservation, the content of a Standardization Agreement" (AAP-6).
5. Implementation is "In NATO Standardization, the fulfilment by a member nation of its obligations as specified in a Standardization Agreement" (AAP-6).
6. Reservation is "In NATO Standardization, the stated qualification by a member nation that describes the part of a Standardization Agreement that it will not implement or will implement only with limitations" (AAP-6).

RATIFICATION, IMPLEMENTATION AND RESERVATIONS

7. Page (iii) gives the details of ratification and implementation of this agreement. If no details are shown it signifies that the nation has not yet notified the tasking authority of its intentions. Page (iv) (and subsequent) gives details of reservations and proprietary rights that have been stated.

FEEDBACK

8. Any comments concerning this publication should be directed to NATO/NSA - Bvd Leopold III, 1110 Brussels - BE.

AIM

1. The aim of this agreement is to standardize the following, for new demolition materiel to be used for NATO armed forces:
 - a. design principles and criteria for safety and suitability for service (AOP-31), and
 - b. methods for testing and assessment of safety and suitability for service (AOP-32).
2. The objective is to:
 - a. to ensure appropriately the safety and suitability for service, and
 - b. to standardize design, testing and qualification of the materiel and to avoid duplication of analyses and tests of demolition materiel supplied by another nation or service.

AGREEMENT

3. Participating nations agree to the following:

STANAG 2818
(Edition 2)

- a. Design principles and criteria for safety and suitability for service laid down in AOP-31 will be applied for all new demolition materiel intended for use by NATO armed forces.
 - b. Methods for the testing and assessment of safety and suitability for service laid down in AOP-32 will be applied for all new demolition materiel intended for use by NATO armed forces.
 - c. All relevant information regarding the results of the analyses, testing and assessment of safety and suitability for service, achieved on the basis of this STANAG, will be provided through the National Authority responsible for the qualification of the munition, to other NATO nations upon valid request.
 - d. The concerned National Authorities will be responsible for:
 - (1) the application of the design criteria in accordance with AOP-31 to new demolition materiel;
 - (2) the acceptance for military use based on analyses and testing in accordance with AOP-32;
 - (3) the execution of the mandatory tasks mentioned or referred to in this STANAG and the associated AOPs; and
 - (4) the decision whether to classify a demolition materiel as a "new demolition materiel" in accordance with the definition given under §6 below.
4. A list of National Authorities is given at Annex.
5. Excluded from this agreement are:
- a. nuclear munitions and nuclear devices;
 - b. demolition materiel, intended for demolitions other than by means of explosives (e.g., by fire, water or mechanical means);
 - c. improvised explosive devices;
 - d. booby traps; and
 - e. training devices which contain explosive materials.

DEFINITIONS

6. The acronyms, terms and definitions published in AAP-6 and the AOP-38 are applicable. For the purpose of this agreement, the following definition applies:

new demolition materiel (French: nouveau matériel de destruction): A demolition materiel which differs from other demolition materials accepted for use by a NATO force, in terms of:

- a. design (definition in accordance with its full data package: material specifications, drawings, etc.);
- b. the users' manuals and other user instructions;
- c. the production definition (product processing, tooling, quality assurance);

- d. acceptance testing;
- e. their specific use or role; or
- f. its life cycle profile and the resulting environmental profile.

GENERAL

- 7. This STANAG and its related AOPs are based on:
 - a. recent munition technologies such as reduction of vulnerability of munitions (MURAT - IM);
 - b. recently defined environmental loads, in particular in the areas of electricity, threats from armed attack, heating, etc.;
 - c. new test techniques; and
 - d. analysis methods for environmental aspects and the assessment of safety and reliability as described in AOP-15, AECTP-100 and ARMP-1.

DETAILS OF THE AGREEMENT

- 8. Details of the agreement are included in AOP-31 and AOP-32.
 - a. AOP-31

This publication provides principles for the design, characteristics and criteria with regard to safety and suitability for service applicable for demolition materiel. The AOP is intended to specify standard guidelines for design and development of new demolition materiel.
 - b. AOP-32

This publication gives guidelines for the assessment of the safety and the suitability for service of new demolition materiel and the related test methods. The AOP is intended to determine and to standardize:

 - (1) the procedures for and the execution of the tests and handling of the results of the assessment performed to verify the compliance of the materiel with the design criteria outlined in AOP-31; and
 - (2) methods for the assessment of safety and suitability for service.

STANAG 2818
(Edition 2)

IMPLEMENTATION OF THE AGREEMENT

9. This STANAG is considered implemented by a nation when that nation has issues instructions in accordance with this agreement for new demolition material with respect to:
 - a. design principles and criteria;
 - b. prescription of test and assessment methods;
 - c. transmission of data and nationally obtained results.

COMMENTS/COMMENTAIRES

Denmark	It is a prerequisite for the Danish ratification and implementation that this STANAG is rectified and implemented by FR, GE, UK and US too.
Danemark	Pour que le Danemark ratifie et mette en oeuvre le STANAG, il est indispensable que celui-ci soit rectifié et qu'il soit mis en oeuvre également par la France, l'Allemagne, le Royaume-Uni et les Etats-Unis.
